

North Coast Unified Air Quality Management District 707 L Street Eureka, CA 95501 (707) 443-3093

NOA DUST MITIGATION PLAN FORM NOA – DM1

Form NOA – DM1 is a guidance document for Dust Mitigation Plans

FOR APPLICATION UNDER THE ASBESTOS AIRBORNE TOXIC CONTROL MEASURE FOR CONSTRUCTION, GRADING, QUARRYING, AND SURFACE MINING OPERATIONS

§ 93105, Title 17, California Code of Regulations

ASBESTOS DUST MITIGATION PLAN

			JI WIIIIGATION I LA	114		
1. Company and Project Information						
Company Name and	Addres	S	Project Location			
Name:			Location:			
Address:			Address:			
City/State:		Zip:	City/State:	Zip:		
Contact:			Bulk Material Sampling Performed:	[] Yes [] No		
Phone: Fax:			Air Sampling Performed: [] Yes [] No			
2. Project Information Type of Project: (Check Road Maintenance Trenching / Utilities Quarrying Activity Grading Activity	k all that		Surface Mining Operation Other (please describe) Aggregate & Asphalt Proce	essing Facility		
3. Site/Facility Information Areas and Facilities within a quarter mile (400 meters) of the Site/Facility: (Check all that apply)						
Residential Commercial Industrial Rural		Hospital School	· —	pr (ontour an anat apply)		

4. Track-out onto the paved public road						
Please mark the box preceding each measure that will be implemented:						
THIS MEASURE MUST BE ADDRESSED:						
Any <u>visible</u> track-out on a paved public road where vehicles exit the work site will be removed; Removal will be performed using wet sweeping or a HEPA filter-equipped vacuum device at two-hour intervals.						
AND installation of one or more of the following track-out prevention measures:						
A gravel pad designed using good engineering practices to clean the tires of exiting vehicles; or						
A grizzly; or						
A wheel wash system; or Pavement extending for not less than fifty (50) consecutive feet from the intersection with the paved public						
road;						
Any other measure(s) as effective as the measures listed above: (Briefly describe below)						
5. Active Storage Piles						
THIS MEASURE MUST BE ADDRESSED:						
Stock and working piles will be kept adequately wetted during the addition and removal of material.						
6. Exposed Areas and Inactive Stockpiles						
o. Exposed Areas and macrive otookphes						
Please mark the box preceding each measure that will be implemented:						
Exposed areas and inactive stockpiles that are prone to mechanical or wind disturbances shall						
include one or more of the following:						
The surface will be kept adequately wetted; or						
Controlled using dust palliatives or suppressants, paving, wind berms or breaks; or Covered with tarps or material that contains less than 0.25% asbestos as determined using an approved						
asbestos bulk test method; or						
Any other measure(s) deemed as effective as the measures listed above. (Briefly describe below)						

Areas Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: A maximum vehicle speed limit of fifteen (15) miles per hour or less;
THIS MEASURE MUST BE ADDRESSED: A maximum vehicle speed limit of fifteen (15) miles per hour or less;
A maximum vehicle speed limit of fifteen (15) miles per hour or less;
AND
AND one of the following: □ Water sufficiently often to keep the area adequately wetted; or □ Pave with asphalt or concrete; or □ Apply chemical dust suppressants or palliatives consistent with manufacturer's directions; or □ Maintain a gravel cover to a depth of three (3) inches with material that contains less than 0.25% asbestos as determined using an approved asbestos bulk test method; or □ Any other measure(s) deemed as effective as the measures listed above. (Briefly describe below)
8. Earth Moving Activities Please mark the box preceding each measure that will be implemented:
THIS MEASURE MUST BE ADDRESSED:
Adequately wet materials to be quarried, excavated, or graded;
9 Off-Site Transport
9. Off-Site Transport Please mark the box preceding each measure that will be implemented.
Please mark the box preceding each measure that will be implemented:
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED:
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site unless:
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site unless: Loads are adequately wetted before and during truck loading operations.
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site unless: Loads are adequately wetted before and during truck loading operations. AND one of the following:
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site unless: Loads are adequately wetted before and during truck loading operations. AND one of the following: Loads are adequately wetted and covered with tarps; or
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site unless: Loads are adequately wetted before and during truck loading operations. AND one of the following:
Please mark the box preceding each measure that will be implemented: THIS MEASURE MUST BE ADDRESSED: The operator must ensure that no trucks are allowed to transport excavated material off-site unless: Loads are adequately wetted before and during truck loading operations. AND one of the following: Loads are adequately wetted and covered with tarps; or Loads are adequately wetted and the material does not touch the front, back, or sides of the cargo compartment at any point less than six (6) inches from the top and that no point of the load extends above the

10. Material Handling/Processing
Please mark the box preceding each measure that will be implemented:
Measures will be taken to ensure the following: No screening operation, or transfer point on a belt conveyor discharges into the air any visible emissions other than uncombined water vapor, for a period aggregating more than three minutes in any one hour which are 50% as dark or darker in shade as that designated as number one on the Ringelmann Chart, or 10% opacity. No crusher discharges into the air any visible emissions other than uncombined water vapor, for a period aggregating more than three minutes in any one hour which are 75% as dark or darker in shade as that designated as number one on the Ringelmann Chart, or 15% opacity. Equipment and operations do not emit dust that is visible crossing the property line.
Such control measures may include: Installation and operation of spray bars on all conveyors; Installation of shrouds at all drop points; or Any other measure(s) deemed as effective as the measures listed above. (Briefly describe below)
11. Frequency of Reporting
Please mark the box preceding each measure that will be implemented:
A reporting schedule will be developed in cooperation with the District that addresses the following: Results of asbestos bulk sampling conducted by the owner/operator to document applicability or compliance with the ATCM, or at the request of the District; and The results of any air monitoring conducted at the request of the APCO.
